

CARIN, as an industry-leading call recording suite, provides a flexible solution for our customers by supporting a broad range of recording methods. With its **highly advanced media processing techniques**, we ensured to **minimize** the tradeoff between the recording quality and storage space requirement, while also being able to provide a fully tailored solution to our costumers, that can adapt to any problem arising in a wide range of industries.

Still not convinced enough? Check out our **Storage Space Calculator** to look at the details!

I am mainly interested in recording ...
